

# Hotel and Resort

Video Production Special offer

# Project - Keep moving

With the negative impact to the economy over the fight against COVID-19, we need to help each other to get back to or at least close to where we had to stop.

Tourism being the main industry in the Maldives, a visual boost along main markets through international and social media highlighting the readiness of the property for present times is essential. Video commercials or promotional clips production might be perceived as high costs, but not with us.

We, Orkeyz Inc, a video production house, has been actively producing promotional material for a number of well-known local entities. With the pause on wheel due the pandemic, most businesses are suffering unlike anytime before. We understand that finance is the least thing that can be raised, but helping out for much reduced costs can be explored.

# Revised CVD Package
